

Vacancy

Requirements and Configuration Expert

RB Rail AS office in Vilnius, Lithuania

Rail Baltica is a once-in-a-lifetime infrastructure megaproject – if you're looking for meaningful job in an international setting, look no further. This is where you can make an impact to be proud of.

You will lend a hand in integrating the Baltic States into the European rail network and building a new economic corridor to bring long-term benefits to the Baltic region and its people. You will work with a cross-border team of more than 200 brightest minds in the industry.

We are looking for a new enthusiastic colleague to join our growing team in a position of **Requirements and Configuration Expert**.

Job summary

The primary responsibility of the Requirements Expert will be to contribute to the development and implementation of the Requirements Management Process. S/he will be responsible to identify specific needs for the configuration, deployment, and availability of the Requirements Management Tool (JAMA) and all process assets for all stakeholders throughout the entire project life cycle for specific projects of Rail Baltica Global Project. The Requirements Expert will contribute to guarantee that requirements are managed according to the RB Rail Requirements Management Process by all stakeholders.

As Configuration Expert, s/he will support the Configuration Manager in the implementation of the Configuration Management Process and will supervise the fulfilment of the Configuration Management process by all involved parties.

What's in it for you

A job with purpose and impact

Exceptional international project experience

Innovation-driven work

Professional and self-development

Flexible work arrangement

Benefits and Bonus programme

Supportive network of professional colleagues

Competitive salary

We will entrust you to

- Contribute to the tailor and implementation and continuous improvement of the Requirements Management and the Configuration Management processes in RB Rail for specific projects needs.
- Support the coordination the Requirements and Configuration Management process with all entities involved (internal and external).
- Support/Coordinate the work with JAMA assessors to implement the Requirements Management environment, data model and the implementation strategy in the tool.
- Supervise the project team to perform Requirements Management and Configuration Management activities.
- Support, assess and be final approver of the Configuration Management activities implemented by all actors involved.
- Contribute to the training for Requirements and Configuration Methodology and tools (JAMA Connect), to RB Rail members and other stakeholders.

To succeed, you should have

- Bachelor's degree in Electrical Engineering, Mechanical Engineering, Civil Engineering, Industrial Engineering, Computer Science or equivalent degree or experience.
- Extensive experience in Requirements and Configuration Management, preferably but not necessarily, for complex projects or organizations in the railway sector.
- Proven experience in the use of a Requirements Management Tools.
- Experience in the definition and implementation of a Requirements Management process.
- Experience in Asset Management is preferable.
- Ability to lead, plan and deliver in interface with numerous stakeholders and under pressure.
- Soft skills - leadership, independency, adaptability, proactivity, strong goal-oriented culture, very good communication, team work, critical thinking, open-minded personality.
