As well as ensuring control and oversight of the developed quality assurance processes and practices along the whole lifecycle of the Rail Baltica Global Project on a daily basis.

What's in it for you

A job with purpose and impact

Exceptional international project experience

Innovation-driven work

Professional and self-development

Flexible work arrangement

Benefits and Bonus programme

Supportive network of professional colleagues

Salary from 3700 EUR (before taxes)

We will entrust you to

- Maintain an integrated project-specific quality management system aligned with the RB Rail General Quality Management System,
- Ensure control and oversight of the quality assurance processes and their execution within RB Rail and in terms of externally provided processes, products and service;
- Develop Quality audit program and Quality Annual audit plans
- Conduct regular Quality audits and inspections
- Collaborate with contractors and subcontractors to validate adherence to quality control processes and/or requirements and identify areas for improvement.
- Coordinate non-conformity management process, including non-conformity analysis, development of the corrective/and preventive actions (CAPA).
- Contribute to the overall CSM-RA (Common Safety Method for Risk Assessment) compliance demonstration by creating the necessary Quality Assurance reports at specific milestones along the project lifecycle and as part of the final Rail Baltica Global Project Safety Case;

To succeed, you should have

- 3+ years of relevant professional experience in in quality assurance roles, preferably in the construction or railway sectors;
- Excellent written and verbal communication skills in English;
- Bachelor's degree in Engineering (Civil, Mechanical, Electrical, or Railway Systems) or equivalent degree and experience;
- Foundational knowledge of engineering process and system assurance principles;
- Strong understanding of ISO 9001 requirements and Quality Management System (QMS) in project.

Application process
