

Vacancy

Hydrology Engineer

RB RAIL AS office in Riga, Latvia

Rail Baltica is a once-in-a-lifetime infrastructure megaproject – if you're looking for meaningful job in an international setting, look no further. This is where you can make an impact to be proud of.

You will lend a hand in integrating the Baltic States into the European rail network and building a new economic corridor to bring long-term benefits to the Baltic region and its people. You will work with a cross-border team of more than 200 brightest minds in the industry.

We are looking for a new enthusiastic colleague to join our growing team in a position of **Hydrology Engineer**.

Job summary

Hydrology Engineer will be responsible for revision of submitted design solution according to the existing requirements of Design Guidelines, with focus on Latvian part of the project. Hydrology Engineer shall ensure that Rail Baltica project implements the most reasonable and cost-effective technical solutions from lifecycle perspective.

What's in it for you

A job with purpose and impact

Exceptional international project experience

Innovation-driven work

Professional and self-development

Flexible work arrangement

Benefits and Bonus programme

Supportive network of professional colleagues

Salary from 2700 EUR (before taxes)

We will entrust you to

- Design review of hydrology, melioration and drainage solutions for Rail Baltica railway project; Oversee the quality of deliverables.
- Analyse design volume estimates (bill of quantities) and specifications provided by Design Consultants.
- Take part in construction process, for example: technical audits and on spot visits of construction site; developing respective answers on the questions and requests for information.
- To review deliveries from interdisciplinary point of view with focus on Interface requirements for railway infrastructure related to hydrological requirements.
- Close cooperation with the national Implementing Bodies and other stakeholders.

To succeed, you should have

- 2+ years of experience related with infrastructure construction and design solutions.
- Higher education in water supply systems, hydrology or hydrogeology fields.
- Previous experience developing design solutions with focus on hydrology.
- Resilient to coping with conflicting demands, able to prioritise duties and work under pressure.
- Understanding of Latvian construction and design standards will be considered as an advantage.
- Fluent in English and good command of technical English.
