Riga

Kaunas

Vilnius

About me

Raitis Bušmanis
BIM Team Leader

- In RB Rail AS since January 2018
- Before working at Trimble Solutions Oy
 - "Involved" with BIM since 2012

Agenda

Development of RailBaltica project

> Digitalization

> First results

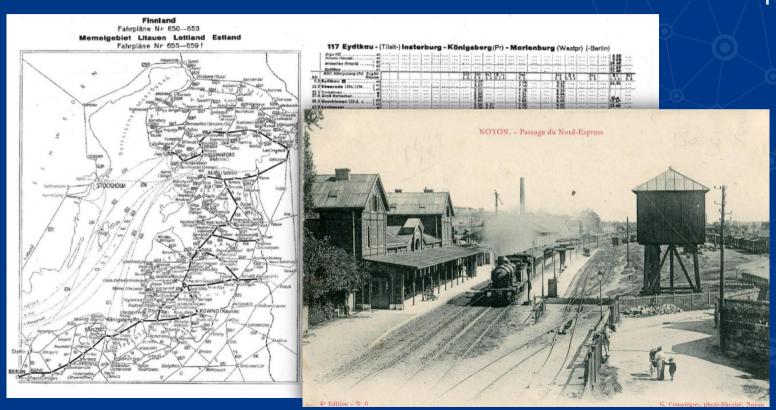

First acknowledgements

Development of Rail Baltica project

The idea of Rail Baltica goes back 25 years

1994

Detailed Technical Design in Estonia

Sections:

- Tallinn to Rapla
- Rapla to Pärnu
- Pärnu to Estonian/Latvian border

Indicative scope of works:

15 bridges

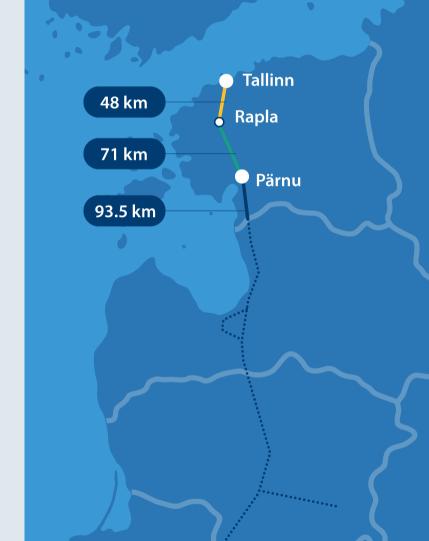

24 railway viaducts

40 road viaducts

24 ecoducts

Detailed Technical Design in Latvia

Sections:

- Riga Central Section
- **Vangaži to Misa**
- Estonian/Latvian boarder Vangaži
- Misa Latvian/Lithuanian border

Indicative scope of works:

32 bridges

43 railway viaducts

82 road viaducts

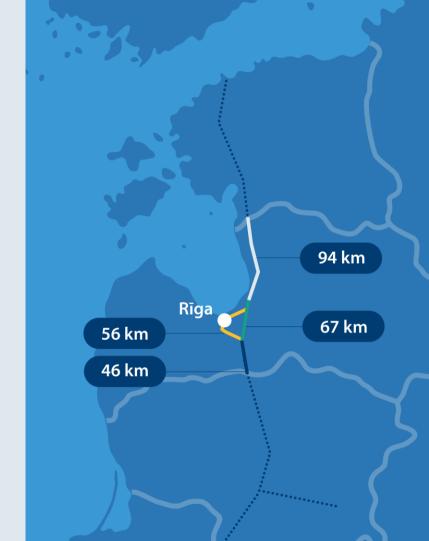

10 ecoducts

13 segregated pedestrian crossings

1 tunnel

Detailed Technical Design in Lithuania

Sections:

— Ramygala to Lithuanian/Latvian state border

Ramygala to Kaunas

Indicative scope of works:

7 bridges

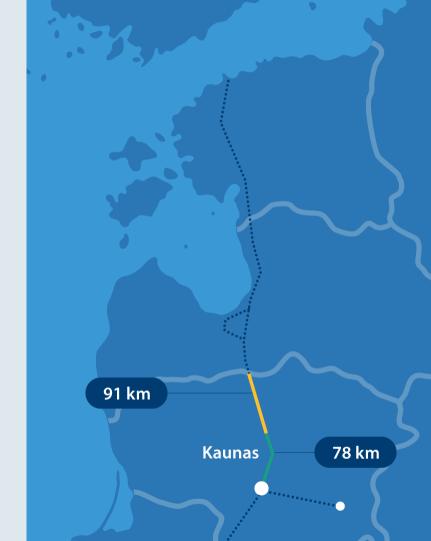

31 railway viaducts

21 road viaducts

ecoducts

Rail Baltica BIM roadmap

industry's

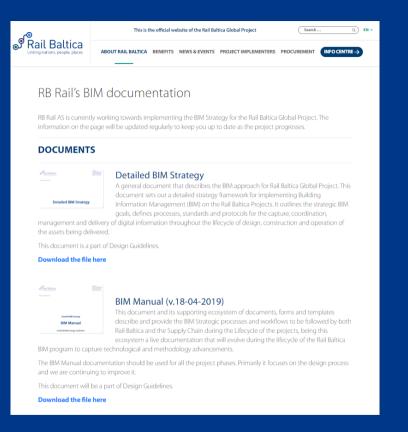

professionals;

solution integration;

their work:

construction sector:

Building Information Management (BIM) Employer's Information Requirements v2.1

This document sets the requirements according to which the supply chain shall work with BIM systems in order to deliver information to Client – RB Rail or National Implementing Bodies.

This document is a part of Design Guidelines

CAD Standards

These standards apply to all drawings (sketches, preliminary, detailed design, construction, shop drawings and asbuilt drawings) and CAD Data (2D or 3D) produced. The intent of these CAD standards is to provide guidelines to ensure that all drawings are prepared to a standard and uniform appearance and reflect high quality workmanship, and that data created by CAD systems is correctly structured and

classified to facilitate re-use and understanding by others. This document is not related to any particular Authoring Tool and it will be each Supplier who develops a specific practical standardization for the Authoring Tool to be used in their project, taking as a base this documentation.

This document will be a part of Design Guidelines.

Download the file here

BEP Template

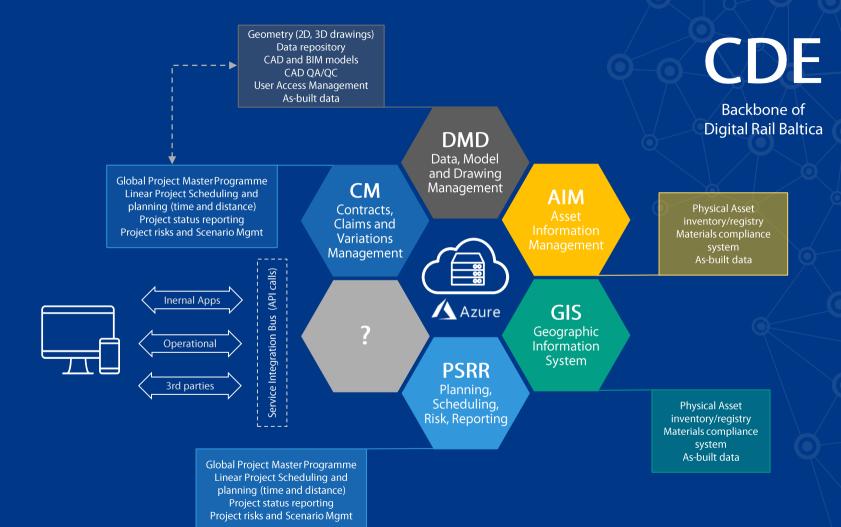

This BIM Execution Pland (BEP) template has been elaborated to be used as the basis for the post-contract BEP. It has to be prepares as a direct response to the BIM EIR and Technical Specifications. The Supplier shall fulfill all the required information in order to show their intention to comply with all the standards and procedures described in the

BIM Manual. The Supplier is free to add extra information.

This document is a part of Design Guidelines.

First acknowledgements

01

→

Set clear requirements

BEP and TIDP

It must correspond to BIM EIR and it shall be agreed during the Inception phase, but must be updated frequently. VE, MD and DTD stages – must be renewed and followed. 02

>

Follow the progress

Client's task

Client must follow the progress. Client must be involved and must have/develop the knowledge. Client must understand what is being delivered. Dedicated team must be assigned (for now).

03

 \Rightarrow

Everybody must learn

Client and Consultant

Teams on both sides must learn. Early stages of the project (VE) serves as «test ground» for Master and Detailed Technical Design stages. 04

→

Demand the results

Contract must be fulfilled

«...we usually don't do it this way...» is not acceptable.

If the rules are agreed, they must be follwed – on both sides.

Contract obligations are for both parties.

First acknowledgements

05

 \rightarrow

Flexibility

To a certain degree it's good

Too much flexibility gives room for misinterpretation = no rules.

Communication is key.

06

Big picture

Client must work with it in mind

Consultants come, do their work and go. Client must think about the goals to be achieved with Digitalization. BIM just to have BIM is not a goal.

07

 \rightarrow

BIM is not alone

AIM, GIS, etc.

Digitalization should be the priority. Modern asset management, digital tools and IT minded engineers. 08

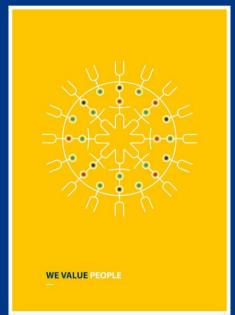

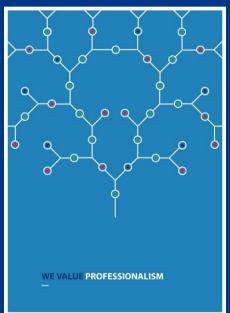

It's not easy

New things are hard

It takes time and effort. It's easy to loose the target and give up. Right people help, but most don't. Right people are hard to find.

Kiitos!
Thank you!
Aitäh!
Paldies!
Ačiū!
